Thanks for choosing our P-104 Water-Activated Tape (WAT) Dispenser. We hope it can bring you a satisfactory sealing experience.

Part I Technical Data

Technical Data of P-104 Water-Activated Tape Dispenser:

MODEL	P-104
Carton Dimension (mm)	360*195*160
Product Dimension (mm)	300*106*120
Gross Weight (kg)	1.0
Net Weight (kg)	0.6
Tape Width (mm)	≤76
Diameter Roll (mm)	≤200
Brushes Piece/Set	2
Operating Temp Range(°C)	0°C~+45°C
Working Humidity Range(%)	5%-95% (non-condensation)

Part II Illustration of the WAT Dispenser

Part III Operating Instructions

The operation of P-104 dispenser is very simple, the specific operation method is as follows:

1. Fill up the Reservoir with 4/5 volume of water.
2. Loosen the tape roll with its gummed side down, make sure the leading end of the tape forward, and place it into the tape holder, adjust the Tape Width Adjusting Back Roller manually to fit the width of the tape roll.
3. Pull the leading end of the tape roll and thread it through the path between the Pressure Blade and the Reservoir. Press on the top of the Pressure Blade, pull the tape to the desired length and tear it up across the blade. The tape is cut and ready for sealing.

Part IV Daily Maintenance

In order to keep the best results, it is recommended that the following daily maintenance should be performed:

1. Check the water level frequently, to avoid uneven moistening due to insufficient amount of water.
2. Clean the brush and blade with soap water regularly to avoid the accumulation of gum which may affect the wetting effect of the tape.
3. Regularly use lubricating oil to lubricate the rotating parts of the equipment, such as the bearings and transmission belts, to avoid inflexible parts causing running stalls or blockages.
4. When a paper jam occurs, carefully check and clean the tape path to avoid paper jam or blockage again.

Part V Safety Precautions

1. During the storage, transportation and handling of this product, please guard against squeezing, falling and impacting, so as to avoid deformation and damage of equipment parts, which will affect the performance of the product.
2. Since the product contains sharp parts such as cutting knife, the product should be placed and used away from children's reach to avoid personal injury.

Part VI After-Sales Service

The warranty period is two year from the date of purchase. We provide the service of repairing and replacing defective parts of the WAT dispenser free of charge during this period.

The expired warranty period and the repair services outside the warranty range are not covered by the warranty. Only the repair cost will be charged under the following situations:

1. The damages caused by equipment handling, equipment installation and improper use;
2. The damages caused by natural disasters or other force majeure factors when user arranges transportation or using it individually.
3. The damages caused by individually dismantling or replacing any internal components of the equipment;
4. The equipment is damaged due to the guidance of non-our professional technicians or failure to follow this operation manual;
5. Quick-wear parts such as blade, reservoir, brush, etc. are not covered by the warranty.
